## Possible Tornado Touch Down

**Minto March 17, 2016:**

Heavy winds or tornado was experienced late afternoon yesterday. There is one property on the Minto Normanby Townline within Minto that has experienced some damage to the barn and some grain bins and trees. Across the road in West Grey there appears to be a little more damage. Neither Minto Fire or Public Works were called yesterday. Brian Hansen, Mike McIsaac and Terry Kuipers were at the scene as there are were trees to remove out of the ditch once Environment Canada has been to the site. The barn will be assessed as to stability.

The road is not blocked and there are not apparent injuries. The farm is owned by a corporation. At this point there is no need for further action as far as emergency planning.
