

Early this morning about 2:00 am a hydro pole was damaged in Harriston at Young and Elora Street. Westario Power will be replacing the pole on Friday May 29, 2015 for most of the day.

The intersection at Young and Elora is now closed and a temporary detour for traffic has been set up as follows. Northbound traffic will be detoured onto Lorne St to Queen St. and Southbound traffic will be detoured down Margaret St to Raglan St. starting immediately and until further notice.

Power is out in many locations in Harriston as Westario conducts this repair. Updates will follow as to power being restored and detour routes. The Town of Minto apologizes for any inconvenience this may have caused but are working to reopen the road as soon as possible.
