

handprint + footprint activity

materials:

construction paper

crayons/makers

scissors

glue

tape

instructions:

1. Trace one handprint and one footprint. Use these as a template to make several pairs of hand prints and footprints
2. Once all your handprints and footprints are traced onto your construction paper, use your scissors to cut them out
3. When you have all your cut out handprints and footprints, glue them to pieces of construction paper
4. When you are completed step 3, tape down the created handprint and footprint pictures to the floor
5. Now you can complete the activity by placing your hands and feet on the paper how they are laid out
